Professional Summary

Detail-oriented and resourceful Software Engineer with over 3 years of experience designing, building, and maintaining scalable web applications. Proficient in full-stack development with a strong focus on backend architectures, API integrations, and automation pipelines. Proven ability to collaborate with cross-functional teams to deliver high-quality software solutions that drive business efficiency.

Core Competencies

- **Languages:** Python, JavaScript (ES6+), TypeScript, SQL, HTML/CSS
- **Frameworks & Libraries:** Node.js, Express, Django, FastAPI, React.js
- **Databases & Tools:** PostgreSQL, MongoDB, Redis, Docker, Git, GitHub Actions
- **Automation & Cloud:** Workflow Automation (n8n), RESTful APIs, AWS (S3, EC2)

Professional Experience

Software Engineer

PTCL Group | Islamabad, Pakistan Jan 2024 – Present

- Designed and implemented scalable RESTful APIs using Node.js and Express, improving data retrieval times by 25%.
- Developed and deployed workflow automation pipelines using **n8n**, integrating multiple legacy database systems with modern cloud sheets to streamline internal hiring operations.
- Managed containerized microservices using Docker, ensuring seamless environment consistency across development, staging, and production phases.
- Collaborated with frontend teams to integrate responsive React.js interfaces with backend services.

Associate Software Engineer

TechSolutions Ltd | Islamabad, Pakistan June 2022 – Dec 2023

- Assisted in the development of a core customer-facing web application using Python and Django.
- Optimized database queries in PostgreSQL, reducing server load during peak hours by 15%.
- Wrote comprehensive unit tests and integration tests to ensure code reliability and minimize production bugs.
- Maintained CI/CD pipelines to automate testing and code deployment processes.

Key Projects

Automated Recruitment Pipeline

- Developed an end-to-end automation workflow that fetches candidate applications, standardizes data structures, and leverages AI APIs for initial candidate screening.
- **Tech Stack:** n8n, JavaScript, Google Sheets API, OpenAI/Gemini API.

E-Commerce Backend Infrastructure

- Built a robust backend architecture for a high-traffic e-commerce platform featuring JWT authentication, product catalog search, and a secure checkout gateway.
- **Tech Stack:** Node.js, MongoDB, Redis, Docker.

Education

Bachelor of Science in Computer Science (BSCS)

National University of Sciences and Technology (NUST) | Islamabad, Pakistan Graduated: 2022
